## **DETAILED ACTION**

### ***Claim Objections***

1. Claims 4-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n).

### ***Claim Rejections - 35 USC § 112***

2. Claim 12 provides for the use of the liquid-crystalline medium, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 12 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1756

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1-3, 5-6, 8-11 and 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Heckmeier et al. (US 20030134056).

The reference discloses a liquid-crystalline medium based on a mixture of polar compounds with positive dielectric anisotropy, which liquid-crystalline medium contains one or more alkenyl compounds of the formula (I) and one or more compounds of the formula (IA). The reference medium is useful for TN or STN display device. The reference compounds (ME2.NF, ME3N.F, ME4N.F, PCH-3N.F.F, CC-5-V, CC-3-V1, CCP-V-1, CCP-V2-1, PTP-201, CCQU-2-F and CCQU-3-F) in Example 75 read on the present formulae (A, B, IV and T2a). Therefore, the reference anticipates the claimed invention.

***Claim Rejections - 35 USC § 103***

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Heckmeier et al. (US 20030134056).

The reference differs from the claim in that the claim has more specific % ranges for the components. The present TN or STN display is known in the art, it would have

Art Unit: 1756

been obvious to those skilled in the art to adjust the percentage of the reference compounds to arrive at the claimed invention because the present compounds are disclosed and suggested by the reference, which are useful and advantage to obtain better liquid crystal properties.
